

5.5 MBTU CHEMICAL UNITS

Our 5.5 MBTU Chemical Units specifically designed for a range of chemical cleaning applications. These units are equipped with two c-pumps, including one 2x3 pump and one 3x4 pump. This unique feature allows us to maintain maximum velocity on vessels and exchangers without having to go through the coil in the burner, (with the potential to circulate two exchangers at once) making our unit the best equipment for the job.

Chemical Unit Services:

- Cascade
- Reverse Flow
- Gamma Jet
- Debulk
- Door Cannon
- Oil Flushing
- Filtering
- Pipeline Cleaning
- Pressure Testing
- Heating
- Heating for Plant Start-up
- Tank Circulation
- Chem Wash Oil Separators
- Chem Wash Treaters
- Chem Wash Exchangers
- Tank Stinging
- Degassing
- Vapor Phasing
- Laser Rust Removal

We also offer a range of chemicals for industrial cleaning upon request.

Equipment

- 5.5 MBTU Burner
- Hopper (for mixing chemical)
- 500L Diesel Tank
- 4 Pumps
 - 3x4 Mission C-Pump
 - 2x3 Mission C-Pump
 - 2x3 Roper Pump
 - 4x5 Gardner Denver Triplex Pump
- 2 4-Cube Tanks
 - Stainless Steel (4-Cube Tank)
 - Carbon Steel (4-Cube Tank)
- Hoses (all tested to 5000 PSI)
 - 100 ft High-Pressure 1" Hose
 - 25 ft 1" Suction Hose
 - 120 ft of 3" Vic
 - 120 ft of 2" Vic
 - 100 ft of 3" Camlock
 - 100 ft of 2" Camlock
